EDUCATION

Istinye University | *Bachelor's Degree in Software Engineering* *Istanbul, Türkiye* | **2022 – 2026**

- Current Cumulative GPA: **3.56 / 4.00 (High-Honor Dean's List)**

EXPERIENCE

Software Engineer - Internship | *Techniaa Systems* *Istanbul, Türkiye* | **Aug-Sep 2025**

- Developed RESTful API services using Node.js and Express.js and TypeScript for production-level backend services
- Implemented a fully functional and secure authentication system with JWT and stored user data on MongoDB
- Applied my knowledge in front-end with React, back-end with Node.js, and AWS cloud services in full-stack projects

SKILLS

Programming Languages:	JavaScript, TypeScript, Python, Java, SQL
Frameworks:	React.js, Next.js, Vue.js, Node.js, Express.js, Nest.js, React Native, AI/ML, Scikit-learn
Databases:	MongoDB, PostgreSQL, MySQL
Cloud & CI/CD:	AWS, Git, GitHub, GitHub Actions, Vercel, Docker
Spoken Languages:	English (C1) Arabic (Native) Turkish (A2)

CERTIFICATIONS

- **MongoDB Node.js Developer Path** *MongoDB University* | **2023**

PROJECTS

- AI-Powered Smart Wound Dressing with Real-Time Monitoring GitHub | Demo
  - Achieved over 80% accuracy after training ML models on medical datasets with over 10,000 records
  - Trained 2 standard machine learning models using Random Forest and Linear algorithms using scikit-learn
  - Integrated generative AI and LLMs using Google Gemini API to generate patient analysis
  - Exposed models with Flask and built a Vue.js + TypeScript web interface for real-time monitoring
- Real-Estate Platform Web App GitHub | Demo
  - Built a full-stack real estate platform (MERN + TypeScript) featuring property listing, authentication, and more
  - Designed responsive and interactive UI in Figma, built over 50 components using React and Tailwind CSS
  - Developed a REST API with 20+ endpoints supporting authentication, filtering, and file uploads on AWS S3
  - Utilized frameworks and libraries such as React.js for the front-end, and Express.js for the back-end
- Social Media Reels Web App GitHub | Demo
  - Created a social media platform for short videos using React, Express, Node, and MongoDB
  - Built a REST API with Express, handling authentication, email verification, and infinite scrolling
  - Stored user data in MongoDB and video files on AWS S3 for efficient media management
- Node.js Library for Creating Filesystem JSON Databases GitHub | Demo
  - Developed and published a Node.js NPM package for creating filesystem JSON-based databases
  - Implemented 20+ database operations with OOP, enabling CRUD and advanced query functionalities
  - Explored NPM publishing, making the library accessible for thousands of developers
- Course Ranking System using PFS-CIMAS-ARTASI Multi-Criteria Decision-Making Model GitHub | Demo
  - Collaborated with a team of 4 engineering students in building an MCDM based course ranking system
  - Collected data from 12 experts of varying importance levels such as university professors and IT specialists
  - Achieved high accuracy using total of 1356 data entries, measured by academic research paper metrics
  - Developed a software program in TypeScript for Picture-Fuzzy-Set based CIMAS-ARTASI decision model
