# Mohamed Bakour

**Software Engineer | Full Stack Developer | AI Integrations | Data Analytics**

Dubai, UAE | +971 56 333 7685 | Golden Visa | UAE Driver's License
mo.bakour@outlook.com | linkedin.com/in/mobakour | github.com/MoBakour | bakour.dev

## EDUCATION

**Istinye University | *Bachelor's Degree in Software Engineering*** *Istanbul, Türkiye* | **2022 – 2026**

- Cumulative GPA: **3.60 / 4.00 (High-Honor Dean's List)**

## EXPERIENCE

**Full Stack Developer | *Self-Employed Freelancer*** *Remote* | **Sep 2024 – Present**

- Built a cross-platform commercial mediation mobile app with React Native, NestJS, and PostgreSQL
- Developed a custom ERP and accounting solution for a client, with integrations across their existing systems
- Improved design and performance, cutting page load times ~40% via CDN delivery, caching, and asset optimization

**Software Engineer - Internship | *Techniaa Systems*** *Istanbul, Türkiye* | **Aug-Sep 2025**

- Developed production-level REST APIs using Node.js, Express.js, and TypeScript for backend services
- Implemented a fully functional and secure authentication system with JWT and stored user data on MongoDB
- Built frontend with React, backend with Node.js, and AWS cloud services in fullstack projects

## SKILLS

| | |
|---|---|
| **Programming Languages:** | JavaScript, TypeScript, Python, Go (GoLang), SQL |
| **Frameworks:** | React.js, Next.js, Vue.js, Node.js, Express.js, NestJS, FastAPI, React Native, PyTorch |
| **Databases:** | PostgreSQL, MySQL, MongoDB, Vector Databases, Redis (Caching), SQL & NoSQL |
| **Cloud, DevOps & APIs:** | AWS, Firebase, GitHub Actions, Gemini API, OpenAI API |
| **Tooling:** | Git, GitHub, Docker, Stripe, Claude Code, Cursor, Tableau |
| **Certifications:** | MongoDB Node.js Developer Path — MongoDB University (2023) |
| **Spoken Languages:** | English (C1) Arabic (Native) Turkish (A2) |

## PROJECTS

- AI-Powered Multi-Tenant Restaurant SaaS Platform (Digital Menu + AI Voice Waiter)
  - Architected a production-grade SaaS platform (React, React Native, Node, PostgreSQL, AWS, Cloudflare)
  - Integrated Stripe for user subscription management, and Stripe Connect for implementing platform payments
  - Implemented AI voice waiter and LLM-based chat bot with integrated tools using Gemini and OpenAI models
  - Developed a React Native + Expo mobile app for restaurant owners providing monitoring, analytics, and control
- Facial Recognition and GPS Geofencing Guarded Anti-Cheat Lecture Attendance System GitHub | Demo
  - Architected a multi-service platform using a Go + Gin backend, React Native mobile app, and React dashboard
  - Built a FastAPI microservice using DeepFace and a PostgreSQL Vector Database for facial recognition
  - Implemented location validation mechanism using native device GPS geofencing
- AI-Powered Smart Wound Dressing with Real-Time Monitoring GitHub | Demo
  - Achieved over 80% accuracy after training ML models on medical datasets with over 10,000 records
  - Trained 2 standard machine learning models using Random Forest and Linear algorithms using scikit-learn
  - Integrated generative AI and LLMs using Google Gemini API to generate patient analysis
  - Exposed models with Flask and built a Vue + TypeScript web interface for real-time monitoring
- End-to-End SaaS Platform Revenue and Infrastructure Data Analytics Dashboard GitHub | Demo
  - Wrote a seeding Python script generating realistic, relational synthetic data across 320k infrastructure log rows
  - Modelled a multi-fact Galaxy Schema inside Tableau to eliminate Cartesian fan-out and data inflation risks
  - Built interactive dashboards tracking core SaaS financial metrics against p95 latency and error rate spikes
- Node.js Library for Creating Filesystem JSON Databases GitHub | Demo
  - Developed and published a Node.js NPM package for creating filesystem JSON-based databases
  - Implemented 20+ database operations with OOP, enabling CRUD and advanced query functionalities

More projects and demos available on my portfolio: bakour.dev
