EDUCATION

Istinye University | *Bachelor's Degree in Software Engineering* *Istanbul, Türkiye* | **2022 – 2026**

- Cumulative GPA: **3.60 / 4.00 (High-Honor Dean's List)**

EXPERIENCE

Full Stack Developer | *Self-Employed Freelancer* *Remote* | **Sep 2024 – Present**

- Built a cross-platform on-demand service marketplace mobile app with React Native, Nest.js, and PostgreSQL
- Developed a custom ERP with integrated CRM and accounting module for a business using Next.js, Express.js, and PostgreSQL, reducing their third-party service costs by 30%
- Developed an e-commerce website for a perfume brand, with an admin dashboard, payment gateway and shipping service API integrations with Next.js and Supabase

Software Engineer - Internship | *Techniaa Systems* *Istanbul, Türkiye* | **Aug-Sep 2025**

- Developed production-level REST APIs using Node.js, Express.js, and TypeScript for backend services
- Implemented a secure JWT authentication system from scratch
- Built frontend with React.js, backend with Node.js, and AWS cloud services in fullstack projects
- Cut response time by 50% via client-side and Redis caching, CDN delivery, and image/file optimization

SKILLS

Programming Languages:	JavaScript, TypeScript, Python, Go (GoLang), SQL
Frameworks:	React.js, Next.js, Vue.js, Node.js, Express.js, Nest.js, FastAPI, React Native, PyTorch
Databases:	PostgreSQL, MySQL, MongoDB, Vector Databases, Redis (Caching), SQL & NoSQL
Cloud and APIs:	AWS, Google Cloud (GCP), Firebase, Supabase, Stripe, Gemini API, OpenAI API
DevOps and Tooling:	Git, GitHub, GitHub Actions, Docker, Claude Code, Cursor, Tableau
Certifications:	MongoDB Node.js Developer Path — MongoDB University (2023)
Spoken Languages:	English (C1) Arabic (Native) Turkish (A2)

PROJECTS

- AI-Powered Multi-Tenant Restaurant SaaS Platform (Digital Menu + AI Voice Waiter) Demo
  - Architected a production-grade SaaS platform (React, React Native, Node, PostgreSQL, AWS, Cloudflare)
  - Integrated Stripe for user subscription management, and Stripe Connect for implementing platform payments
  - Implemented AI voice waiter and LLM-based chat bot with integrated tools using Gemini and OpenAI models
  - Developed a React Native + Expo mobile app for restaurant owners providing monitoring, analytics, and control
- Facial Recognition and GPS Geofencing Guarded Anti-Cheat Lecture Attendance System GitHub | Demo
  - Architected a multi-service platform using a Go + Gin backend, React Native mobile app, and React dashboard
  - Built a FastAPI microservice using DeepFace and a PostgreSQL Vector Database for facial recognition
  - Implemented location validation mechanism using native device GPS geofencing
- Machine Learning Model Training for Smart Wound Dressing with Real-Time Monitoring GitHub | Demo
  - Trained regression and classification models using Random Forest and Linear algorithms with over 80% accuracy
  - Cleaned and preprocessed 10,000+ medical records, handling missing values, feature encoding, and scaling
  - Integrated generative AI and LLMs using Google Gemini API to generate patient analysis
  - Exposed models with Flask and built a Vue + TypeScript web interface for real-time monitoring
- Tableau Dashboard for End-to-End SaaS Platform Revenue and Infrastructure Analytics GitHub | Demo
  - Wrote a seeding Python script generating realistic, relational synthetic data across 320k infrastructure log rows
  - Modelled a multi-fact Galaxy Schema inside Tableau to eliminate Cartesian fan-out and data inflation risks
  - Built interactive dashboards tracking core SaaS financial metrics against p95 latency and error rate spikes
- Node.js Library for Creating Filesystem JSON Databases GitHub | Demo
  - Developed and published a Node.js NPM package for creating filesystem JSON-based databases
  - Implemented 20+ database operations with OOP, enabling CRUD and advanced query functionalities

More projects and demos available on my portfolio: bakour.dev
